Smart Construction Retrofit v1.7.2 Update details

EARTHBRAIN

The calculation process for swing boom and offset boom specifications has been corrected.

- Contains fixes for controller FW v1.7.1 and earlier.
- For information on how to update the controller FW, please refer to the article on the support website. ([Europe](#) / [US](#) / [Australia](#) / [Asia](#))

■ Important matter

- When using machine guidance function with swing boom and offset boom, be sure to **update controller FW to v1.7.2 or higher.**
- When using machine guidance function with swing boom, be sure to **update tablet app to v1.0.04.2 or higher.**
- Offset boom is not yet supported as of tablet app v1.0.04.2
(The supported version and release date will be notified in the tablet app release notes.)
