
SMART CONSTRUCTION
Pilot Web v5.7.0
Updates

We have revised the error messages that occur during project file creation. The conversion status now displays the cause of the error and the corresponding resolution method.

In the event of the following errors, detailed information and resolution methods will be displayed:

- Duplicate layer names in the design layer
- Lack of localization information
- Multiple registrations of files with localization information
- Uploaded files with a size of 0 bytes

Ex: Multiple registrations of files with localization information

Conversion Status

Version	1
Last Updated	2023/12/14
Status	

Multiple files containing localization information cannot be registered.
Please register only one file that contains localization information.

[Target file]
MIHAMA2nd_20161111.gc3
MIHAMA2nd_20161111.tp3

Conversion errors in v5.7.0 or later are covered.
Existing errors will display the following.
