

Steer Indicator User Manual

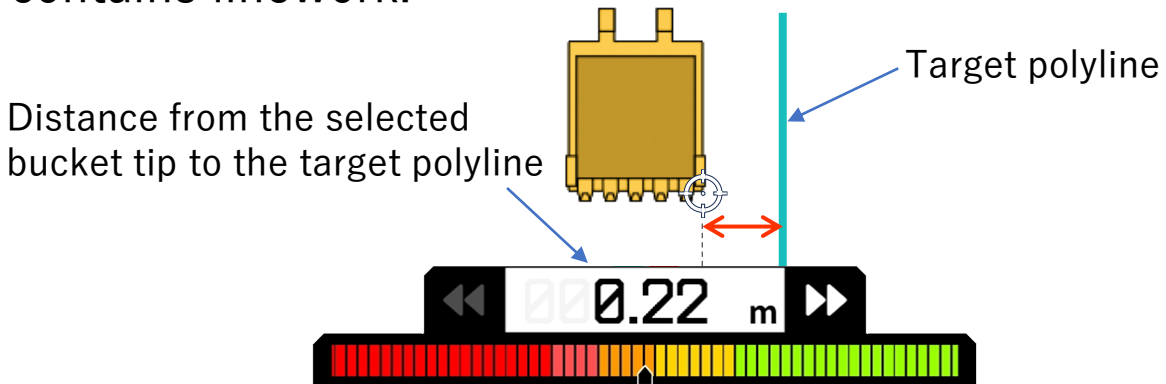

【Attention】

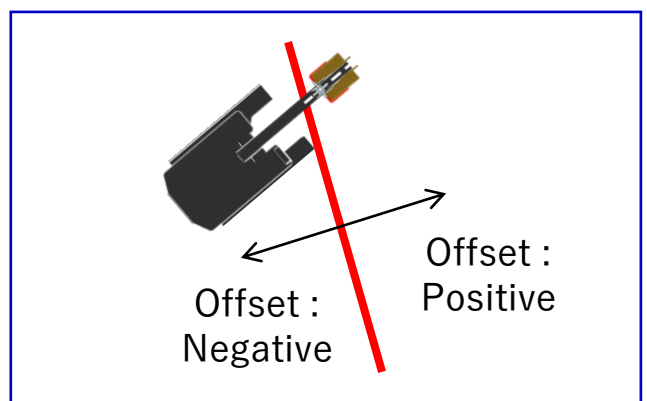

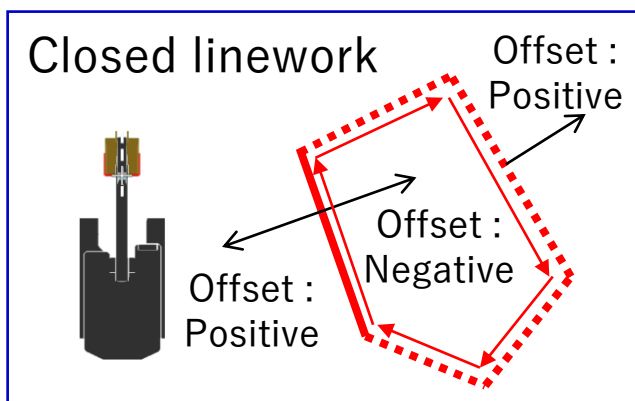

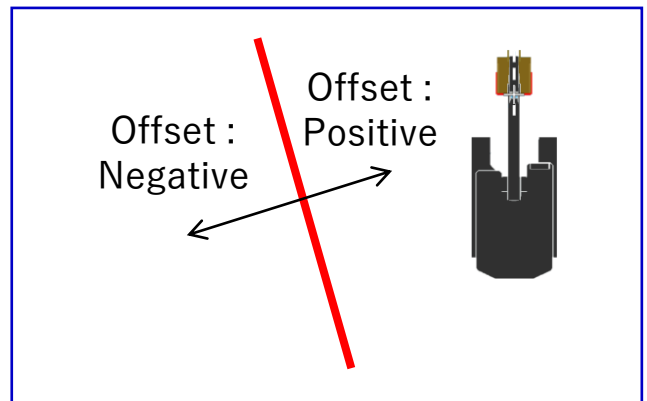

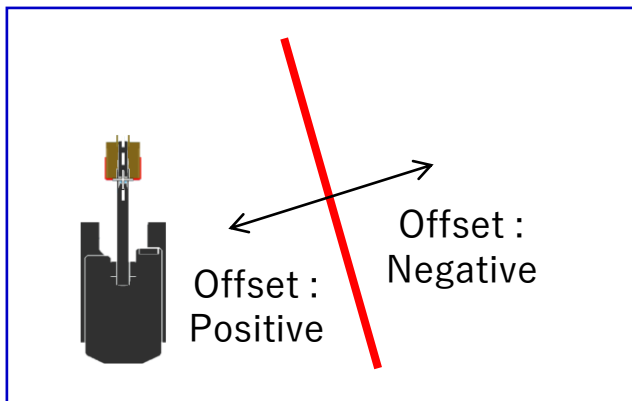

This function is available with tablet app version 1.0.06 or later. If you are using an older version, please update the app.

Introduction

This function provides horizontal guidance for selected polylines. To use this function, select a project file that contains linework.

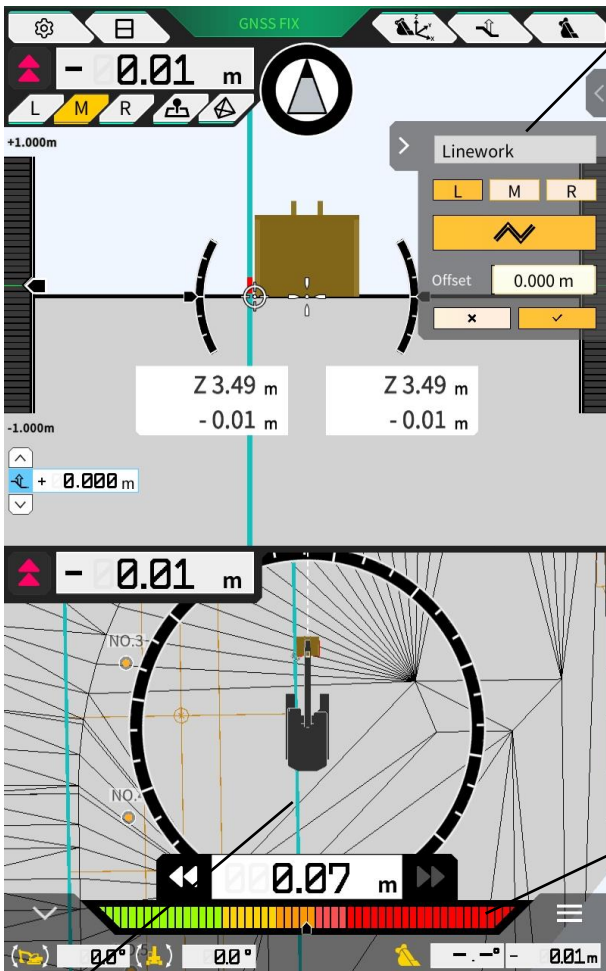

The offset direction depends on the relationship between the position of the bucket and the selected linework.

How to see the screen

This section explains how to view Steer Indicator displayed on the guidance screen.

■ Side panel

○ Layer name

The layer name of the selected polyline is displayed

○ Cutting edge

Cutting edge position to show a distance to the selected polyline

○ Select polyline

When you tap , move to "Select Polyline" screen

○ Offset

The offset distance from the selected polyline

■ Steer Indicator

When you select a polyline and applied, this indicator will be shown

■ Selected/Offset line

"Selected Line" and "Offset Line" are displayed in Plan View and Section View
